Project Background

- **Replace** 20-year-old, off-support Infor solution
- **Implement** a modern financials management solution that is easy-to-use, functionally deep, and scalable
- **Enable** decision support with real-time information and analytics
- **Tailor** operational reports based on individual requirements
- **Adhere** to best business practices and eliminate outdated processes such as labor-intensive manual journal entry

Oracle Consulting Solutions

- Used Oracle's **True Cloud Method™** to drive large-scale project on an accelerated timeline
- **Addressed data quality** issues during migration for 100% reconciliation
- **Built integrations** with third-party systems using Oracle Integration Cloud Services (ICS)
- **Leveraged Cloud Adoption Services** for change management
- **Created “read only” roles** to support segregation of duties compliance

Project Outcome

- **Eliminated** time-consuming, costly capital expenditure on upgrades
- **Accelerated** user acceptance and solution adoption with well-defined project and precise communication
- **Instilled** confidence in users' ability to provide leaders with reliable, real-time support for business and finance operations
- **Positioned** Textron for future growth

On-Time and On-Budget

Textron Hits Cruising Altitude with Oracle Consulting

SUCCESS BY THE NUMBERS

14

Weeks to go live

20+

Components now residing on a seamless integration platform

200

Users trained and using modern best practices
